

System Solution Finder Throws a Curve

Speed-Torque Curve Generator is back

Earlier this year, we updated Parker's System Solution Finder, one of the most popular downloads we offer. But this new version, 3.2, did not include the speed-torque curves. Well, we're pleased to say the speed-torque curves have now been included in the latest release, 3.3.0.

This handy tool gives you a quick look at the motor drive performance without the need for detailed sizing.

Also added in 3.3.0:

- Aries Single-Axis Drive Controller
- Compax3 EPL versions

This new edition is now available for download from www.parkermotion.com/sizing.
