

Your Feedback Is Important!

Take the Automation Watch survey.

Parker's Electromechanical Automation Division works hard to provide our customers with meaningful information – information that will help make your job easier and your company more successful. Automation Watch is part of that effort, and we would love to hear what you think of this enewsletter.

Would you take just 5 minutes to respond to an online survey? There are only 9 questions, and we'd appreciate your feedback.

To take the survey, please [click here](#).

Thank you!
