

Distributor Spotlight: Don Blackburn Company, Inc.

The company Don Blackburn founded in 1939 has grown from a small motor rewind shop in Detroit to a major supplier of industrial automation control products. Now located in Livonia, Michigan, Don Blackburn Co. became a Parker distributor in 2002.

With 45 employees, the company offers application support, training and a full line-up of Parker's Electromechanical Automation products. The industries they focus on in their east Michigan territory include automotive, packaging, plastics, test and general industrial machinery. They're also experts in safety, vision and sensors.

“At Don Blackburn, we do not just sell products – we provide solutions to applications,” says Brian McInnis. “We go beyond the task of selling equipment and are committed to the ongoing service that our customers require. We continuously provide knowledgeable and reliable service. No excuses. No exceptions. We look forward to becoming your partner in providing our joint customers with precision automation solutions and to become your number-one ATC.”
