

Interphex to Showcase Parker Products

Tradeshaw will highlight HMI solution that aids FDA 21CFR11-compliance issues.

Coming soon to Philadelphia: Parker solutions for the life science market!

The Interphex Pharmaceutical Manufacturing Conference & Exhibition is widely regarded as a trusted source for leading-edge technology, education and sourcing of the products and services that drive scientific innovation for life sciences manufacturing from drug development to market. The tradeshow, held this month in Philadelphia, will feature a number of products from Parker's Electromechanical Automation Division this year.

Among the solutions Parker will be exhibiting for the life sciences industry are the **InteractX™** HMI software and **PowerStation** family of industrial PCs. InteractX™ is an award-winning, Windows-based HMI that is specifically designed to ease compliance with the FDA's 21CFR11 regulations.

Our **EPX** and **HPX** PowerStations come pre-loaded with InteractX™ software and provide the e-signature and logging tools necessary for Part 11 compliance with no scripting required. This "Easy E-Sigs" capability comes at a price that is closer to simple panel-level HMIs than other Windows® solutions!

Discover how Parker helps OEMs lower the cost of motion control technology and speed time to market by visiting us in March:
