Introducing the PA2 PowerStation

Parker's latest operator panel is a drop-in replacement for many popular brands.

Engineered and tested to be factory-floor rugged, Parker's PowerStations have always been high-quality workstations users could depend on.

Continuing that tradition is the new PA2 family of PowerStations, CTC designed and manufactured to be an economical push-button-panel replacement solution with the option to include advanced software features.

The PA2 family has been designed as a direct drop-in replacement for our popular PA family of PowerStations. The PA2 offers new higher performance processors and TFT displays in all sizes.

The PA2 family continues to offer the 6", 8", 10.4" and 15" color touchscreen display sizes of the PA family, but also adds a new no display option. All units combine the connectivity, functionality and expandability of Interact HMI software with standard hardware features such as TFT displays, CompactFlash storage, RS-232, RS-422/485 and 100 Base-T Ethernet ports. Interact remains one of most powerful and expandable Level 1 HMI packages available, with basic panel tools, graphics, alarming and networking capabilities included in the base configuration. It also offers such options as recipes, reporting, historical trending, machine configuration and even custom user programs. It provides the ease of use of Windows® for development with a highly reliable runtime environment.

PA2 Functionality

• CTC-designed and manufactured for reliability with consistent hardware features for all units
• Feature-rich with Interact Panel Tools, Graphics, Alarming and Networking software features
• Expandable with optional Interact software modules such as Historical Trending and advanced recipe management
• Flexible connectivity with more than 50 communication drivers, including Ethernet drivers

• Designed for easy "drop-in" replacement of our PA family PowerStations and many other popular operator panels
PA2 Features
• No display, 6", 8", 10.4" and 15" touchscreen displays
• CompactFlash and 100 Base-T Ethernet
• Interact HMI software with advanced module support
• Multiple control device connectivity
• Slim profile with consistent features
• Quick and easy clip mounting
• Type 4/4X rating
